<b>Date:</b>	28 March 2025

## 01 What is this product?

### How is my money invested?

The product dynamically adjusts investment risk based on each saver's retirement horizon, providing a personalized and adaptable retirement savings solution. The Growth PEPP works by investing in an underlying portfolio selected based on the saver's time to retirement. In the higher-risk period (any period above 10 years to retirement), the longer the time until retirement, the more risk a saver can take on, which usually means higher potential returns but also higher volatility. As the saver approaches retirement (at 10, 6, 3 and 1 years until retirement), the PEPP starts to gradually de-risk by changing its investment to more conservative underlying portfolios, reducing potential losses but also potential gains. The underlying portfolios are passively managed, multi-asset and globally oriented, with assets diligently invested in high-quality and highly liquid Exchange Traded Fund (ETF) products that offer comprehensive diversification. Market exposure is achieved through investing in underlying Exchange Traded Funds (ETFs), entailing the following asset classes: cash and cash equivalents, fixed income, equities, alternative investments and derivatives. Performance is calculated as the change in the Net Asset Value per share of the underlying portfolio that the PEPP invests in.

More information on the investment Policy principles is available at [www.lifegoals.eu](http://www.lifegoals.eu)

---

## Who is this for?

The plan offers a long-term investment opportunity that is portable across borders, making it particularly appealing to young people and workers who are mobile within the EU. This product is generally suitable for those who are willing to take on some level of risk, can tolerate some loss and are looking to invest for the long-term. The Growth PEPP adopts a more aggressive strategy than the Basic PEPP during both the accumulation and decumulation phases, aiming for higher potential returns in exchange for increased risk.

---

## Are my savings guaranteed?

To protect your money, PEPPs can either provide a guarantee or take steps to minimize the risk of you losing your money. This PEPP:

- Does not provide a guarantee but takes the form of a risk mitigation technique consistent with the objective to allow the PEPP saver to recoup all the capital put in over time (minus any costs and charges).
- 

## What happens when I retire?

You can choose to receive your pension from the following options:

- Lump sum
  - Draw down payments
  - A combination of these
- 

## What happens to my PEPP savings if I die/ become disabled/ live longer than assumed in my PEPP contract?

**If I die:** Your benefit becomes the subject of inheritance law.

**If I cannot continue to pay into the PEPP:** Your money will continue to be invested however your account will be credited with the applicable fees as described in the PEPP contract.

**If you choose to receive monthly payments after retirement, but live longer than assumed in your PEPP contract:** In the drawdown payout form, the funds intended for payout may be spent during retirement. LifeGoals Financial Services Limited does not provide a form of lifetime annuity that guarantees pension payment until your death.

---

## What happens if I move countries?

If you change your residence to another Member State where we do not provide the option to open a sub-account, you have the right to continue contributing to your last open sub-account with us, or you can change your PEPP provider immediately. If you wish to switch providers, the European Insurance and Occupational Pensions Authority (EIOPA) maintains a [public register](#) containing all information on registered PEPP providers and on the Member States where PEPP products are offered. This register also contains information on the conditions of the savings and payout phases for each country.

LifeGoals Financial Services currently offers sub-accounts in: (a) Cyprus (b) Czech Republic (c) Belgium (d) Ireland (e) Austria and (f) Poland.

---

## Can I withdraw from the product early or stop contributing to it?

You may not withdraw from the product until:

1. You have reached the age of 60, but have not reached the age of 75
2. If your occupation is one from which you can retire before age 60 in accordance the Irish Taxes Consolidation Act 1997, when you have reached the age of 50 but not reached the age of 75
3. At any time if you become incapable through infirmity of mind or body of carrying your own occupation or any occupation of a similar nature

For more details please refer to Sections 2 and 5 of this document.

You may also decide to stop contributing to your PEPP account without any penalties or additional fees. However, your PEPP account will continue to be charged the administration / investment management fees as agreed upon in the PEPP contract.

---

### **Can I switch my provider?**

Yes, you may switch PEPP Provider domestically or in a different EU country, free of charge. When you become a PEPP client for the first time, you can switch to another Provider after a minimum of 5 years has passed. If you have switched Provider at least once, you can subsequently switch again after 5 years from the last switching date. Should you transfer securities, the cost of transferring will be kept to a maximum of up to 0.5% of the value of the transferred assets. The minimum period does not apply if you wish to open a sub-account in a country where LifeGoals Financial Services Limited does not provide a service or in the cases set out in the General Terms and Conditions.

---

### **Can I change my investment option?**

The default investment option is the Basic PEPP. However, you may change your investment option free of charge subject to the results of the suitability assessment, performed during the opening of your account. You may submit a request to change your investment option at any time via your online account. Such modification will be implemented on a weekly basis.

---

### **Will my money be invested sustainably?**

The LifeGoals Growth PEPP integrates environmental, social, and governance (ESG) factors in its investment process. LifeGoals Growth PEPP invests in underlying funds that integrate the following criteria in their investment process:

- a. Article 8 or Article 9 Classification: Underlying funds are screened according to classification. For Equities and Bonds, the investments are Article 8 or Article 9 funds of the EU Sustainable Finance Disclosure Regulation (SFDR). These classifications indicate that the investments promote environmental or social characteristics or have sustainable investment as their objective.
- b. Exclusion Criteria:
  - Controversial Weapons
  - Tobacco
  - Thermal Coal
  - Failure to comply with the UN Global Compact Principles
  - Sovereign issuers with an ESG sovereign rating of at least BB
- c. ESG Scoring: Underlying funds evaluate the ESG performance of each underlying investment using ESG scoring by LSEG/MSCI.

While this approach allows investors to align their investments with their values, the LifeGoals Growth PEPP does not make claims about the impact of ESG integration on actual or expected performance.

---

### **Is this governed by Cypriot law?**

The PEPP product and the PEPP contract are governed by Cypriot law and any disputes shall be brought before the Cyprus courts.

---

### **Can I cancel or change my mind?**

You have the right to change your mind within 15 days upon signing the contract provided, however, that you have not invested any money in your PEPP account.

## 02 What are the risks and what could I get in return?

This pension product has been classified as a 2 out of 4. A lower risk profile suggests more stable but moderate returns, while a higher risk profile indicates greater potential for both higher and lower returns. The indicator is subject to investment performance, the saving period, and risk-mitigation measures.

The Summary Risk Indicator (SRI) provides a standardized and comparable measure of risk across different PEPPs, allowing investors to assess risk levels consistently within the PEPP framework. However, the SRI is not directly comparable to risk indicators used for other financial products, as different methodologies apply.

More information on the methodology used for the PEPP risk indicator is available via the following [link](#).

### Is there a risk that I will lose all my invested capital?

The probability of losing all your invested assets is minimal, as the assets are diligently invested in high-quality and highly liquid stock, bond, cash and alternative investment ETF products that offer comprehensive diversification. The objective of a PEPP based on the risk-mitigation technique is to enable the PEPP saver to recover the invested assets after costs have been deducted, without any obligation to return the assets as in guaranteed PEPPs.

### What can I expect at retirement?

It's impossible to predict exactly how your savings will evolve over time, but to help you know what to expect, here are three possible scenarios. Your final retirement income will depend in part on your age now (because the younger you are now, the longer you will save for), and in part on how the investment market performs.

Assuming you invest €100 each month until retirement, in this PEPP:

Your Current Age	If your investments perform poorly, you could receive:		If your investments have medium success, you could receive:		If your investments perform very well, you could receive:	
	Lump sum	Monthly	Lump sum	Monthly	Lump sum	Monthly
25	€82,384	€403	€143,336	€702	€265,451	€1299
35	€49,145	€241	€75,218	€368	€120,671	€591
45	€27,580	€135	€36,415	€178	€49,572	€243
55	€12,083	€59	€13,906	€68	€16,139	€79

These figures are adjusted to take account of inflation, as an increase in the general price level can have an impact on savings in any form. If you want to understand better how the scenarios are built, please visit the following [link](#).

Please be advised that the tax law of the Member State of your residence may have an impact on the actual payout.

## Tax Considerations (Ireland)

### Accumulation phase

Contributions to the Irish PEPP sub-account may qualify for income tax relief in accordance to s. 787Z of the Taxes Consolidation Act 1997, as amended from time to time, and Section 20 of the Finance Act 2022.

The amount of tax relief available is subject to:

1. Age-related limits, based on a percentage of the saver's relevant earnings in the tax year;
2. A minimum relief threshold.

For the specific limits/thresholds, please refer to s. 787Z of the Taxes Consolidation Act 1997, as amended from time to time, and Section 20 of the Finance Act 2022.

\*The limits apply to the sum of contributions to a PEPP, PRSA, RAC and/or an occupational pension scheme.

Investment returns tax treatment:

1. Investment income within a PEPP is exempt from income tax, if used solely for the PEPP's purpose.
2. Futures and options trading are considered "investments" and their profits may also be exempt.
3. Underwriting commissions received and used for PEPP purposes are also tax-exempt.

\*All exemptions require claims to be filed with Revenue and approval from the Revenue Commissioners.

### Decumulation phase

Please be advised that the tax law of the Member State of your residence may have an impact on the actual payout. For Ireland, please refer to s. 787AA of the Taxes Consolidations Act 1997 and Section 20 of the Finance Act 2022. Withdrawals from a PEPP are treated as income under Schedule E of the Income Tax Act 1967 and are therefore subject to Pay As You Earn (PAYE) income tax. Up to 25% of the accumulated value of the PEPP sub-account may be withdrawn as a tax-free lump sum.

If no retirement benefits have been taken from the PEPP account by the time the PEPP Saver reaches age 75, the PEPP is automatically classified as a vested PEPP in accordance to Section 20 of the Finance Act 2022 as amended from time to time, and s.790D of the Taxes Consolidation Act 1997, as amended from time to time.

In such cases, the PEPP is deemed to be fully withdrawn for tax purposes, and Irish income tax is applied on the full value of the PEPP, unless the funds are transferred to an ARF or otherwise exempt under Irish Revenue rules.

## 03 What happens if LifeGoals Financial Services is unable to pay out?

The Company is a licensed Cypriot Investment Firm (CIF) and the assets of the savers are segregated from the assets of the Company, therefore your assets or the Company's ability to pay out are not affected by the management of the Company. Additionally, as a regulated CIF, the Company is a member of the Investor Compensation Fund which pays compensations for up to €20.000 if your assets become unavailable under the law. Please visit [www.lifegoals.eu/legal](http://www.lifegoals.eu/legal).

## 04 What are the costs?

The numbers below show the impact of costs on accumulated capital of €1200 (€100 monthly for a year), expressed in both EUR and percentage terms.

The product dynamically adjusts investment risk based on each saver's retirement horizon. As a result, the charges associated with the product may vary over its lifetime for individual savers, depending on their specific investment horizons. Savers will face on average the following charges

### One-off cost

Total one-off costs at signing product contracts: **€0**

Exit costs when exiting before five years of opening: **€0**

Total annual costs	0.91%	€5.83
These costs are a percentage of your savings paid in		These would be the expected annual costs

## 05 What are the specific requirements for the sub-account corresponding to Ireland?

### Requirements for the pay-in phase:

Min./Max. age of PEPP Saver

You can become a PEPP saver at any age before 75 years old, because PEPP must vest by age 75.

### Requirements for the pay-out phase:

Payout eligibility /  
Right to retirement  
benefit

1. You have reached the age of 60, but have not reached the age of 75\*; or
2. If you are employed in an occupation from which people customarily retire before age 60 in accordance the Irish Taxes Consolidation Act 1997, when you have reached the age of 50 but have not reached the age of 75; or
3. At any time if you qualify for early payout under s. 772 and Chapter 9 of the Taxes Consolidation Act 1997, and Section 20 of the Finance Act 2022 (i.e PEPP saver has become permanently incapable through infirmity of mind or body of carrying on the PEPP saver's own occupation or any occupation of a similar nature for which the PEPP saver is trained or fitted).

\* Please note that there is no automatic payout at age 60. You must elect to begin withdrawals. If you take no action by the month you become 75 years old, the account becomes a vested PEPP triggering tax-related consequences. For more information please refer to Section 20 of the Finance Act 2022 and the Taxes Consolidation Act 1997.

Inheritance of benefit

In case a PEPP saver dies during accumulation phase, the benefit is paid to the legal heirs of the PEPP saver. There is no Income Tax charge but the normal Inheritance Tax (Capital Acquisitions Tax) provisions apply.

If death occurs after the drawdown of benefits has commenced, or is deemed to have commenced, the taxation treatment of the PEPP account/funds is similar to that which applies to an Approved Retirement Fund (please refer to Section 20 of the Finance Act 2022).

Where and if tax implications arise, the PEPP Provider reserves the right to cover any applicable and justified administrative costs for any administrative actions with the Tax Department.

Modification of  
Payment methods

Where a Client maintains opened sub-account(s) with the Company, they may request to modify the form of out-payments of each sub-account as follows:

- One year before the start of the decumulation phase;
- At the start of the decumulation phase;
- At the moment of switching.

## 06 How can I complain?

You may file a complaint via our website at [www.lifegoals.eu](http://www.lifegoals.eu)
